

RE: MB Docket No. 15-149

Tom Wheeler
Chairman
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Chairman Wheeler,

On behalf of Pinnacle Communications Services, I am writing to extend my support to New Charter, a potential new cable broadband company that stands to improve the industry through innovation and investment. New Charter would have a big impact on companies across its national footprint, bringing affordable products to businesses that require the latest technology to compete at the highest levels. We believe New Charter's influence would be entirely positive and would encourage fruitful competition in the telecommunications industry.

~~Pinnacle Communications Services provides technology infrastructure to Fortune 1000 companies. Our~~
clients cross a variety of industries such as Entertainment, Healthcare, Education and Financial Services. We rely on broadband communications companies to help our clients with their technical networks. We work with many cable companies, and have the experience to know what kind of services our customers need most. We believe our clients would find great success with New Charter, and we hope its merger is approved.

New Charter would provide businesses like our clients with the most innovative broadband services. It would be committed to investing in future technologies, including full network digitization. Charter has actually already begun this process, investing hundreds of millions of dollars across the country. New Charter would digitize all Time Warner customers, and offer Charter's cloud-based guide across its client base. New Charter's investments would extend to commercial and residential network lines, improving both its service to its own customers and to our nation's broadband infrastructure as a whole.

We are very impressed with New Charter's commitment to innovation, and believe it would provide superior products to our clients. We hope you will consider the many benefits of the merger and join us in support.

Sincerely,

Joe Licursi

President, Pinnacle Communications Services
